Coleman Grands Remain As Tourney Champions

Coleman Grands again proved that they can play hockey when the chips are down, especially when money is involved. The Grands edged the highly rated Lethbridge Allisters 5-4 in the first game and then went on to beat the Fernie Rangers 6-5 in overtime to walk off with the top prize.

In the opening game against the Allisters the Coleman squad was far from their top form and this showed quickly on the score board. Allisters took full advantage of Coleman's lapses and sloppy plays to go three goals up by the end of the first period.

In the second Coleman began to press and improve as they scored two goals while holding Allisters to one.

The third period was all Coleman as the Grands really poured it on in an effort to pull the game out of the fire. When the smoke cleared Coleman walked off with a well-deserved 5-4 victory with Scodellaro the hero. The hard-working youngster from Bellevue scored three goals, including the winner, while Gettman and Kryczka

provided the other marks.

With about two hours rest the Coleman squad took to the ice in the final against the Fernie Rangers. Both teams skated and battled and were seldom more than one goal apart. Fernie led 3-2 at the end of the first, 4-3 at the end of the second while the third ended in a 5-5 draw.

Coleman pulled the game out of the fire with an unbelievable last second goal when Fraser relayed to Kryczka and he passed to Scodellaro in front of the net who made no mistake as the bell was about to go.

In the sudden death overtime session with the first goal by either side to end the contest Serafini scored for Coleman on a pass from McVeigh to end the thrilling game and the tournament.

Coleman scorers were Kryczka and Scodellaro with two each while singletons went to McVeigh and Serafini.

The last game was attended by about 1200 fans and the Fernie 3300 Club reports the tournament a complete success.

Have YOU Helped Lorna and Coleman?

Helping Lorna by buying tickets means helping Coleman. Have YOU, a citizen or organization of Coleman, contributed to the support of Lorna? Your support, besides financially aiding the High School student body, also effectively benefits Coleman by advertising it as the town to represent the Crow's Nest Pass at the Banff Winter Carnival.

This queen contest terminates on February 10, so let's help Lorna and ourselves in these few remaining days by buying tickets. VOTE FOR LORNA AND COLEMAN.

Will Lorna be the 'Winter Queen' to represent Coleman at Banff? IT'S UP TO YOU!!

Annual Ratepayers Meeting, Mon., Feb. 11

Citizen of Coleman. Don't forget your rate payers meeting on Monday, February 11th in the Council Chambers. It is important that you attend. Civic affairs are your affairs, and require your support. The Coleman Journal urges you to attend if at all possible.

Talented Artist To Be Heard At Blairmore

Helen Schmitt of Regina, young talented pianist and violinist, will close the series in Blairmore on Thursday, February 14 with a piano recital in the United Church.

She has been chosen as Saskatchewan's leading musician for 1956. She is still a high school student but already possesses a music degree in piano and violin. She has a busy musical and teaching life in Regina. She plans to go to Europe this fall to continue her musical studies.

Fifteen years ago a venture involving the exchange of students between two studios of two of Canada's leading music teachers resulted in far reaching consequences. It resulted in the Young Artist Series, a group of concerts that are performed across Western Canada by two or three or even more of Canada's most promising young musicians. Auditions are held each year with some of the best precautions and decisions made by the conveners of the Young Artist Series.

It is hoped that the Crow's Nest Pass residents will turn out in full force to hear this evening's entertainment and that it will prove an incentive to all young-music students of the district.

Tickets are on sale at Mrs. Bucken's music studios in Coleman.

Natural Gas Service For 'Pass Points Is Discussed

Mayor William Gray and councillors William Jallep, Joe Bobroky and Tom Gibos, all of Blairmore, and Mayor Frank Abousay and councillors John Ramsey and Angelo Toppino of Coleman met with F. W. Paterson of Lethbridge and Harvey Greenway of Calgary, both of the Canadian Western Natural Gas Company in the Blairmore council chambers recently.

Purpose of the meeting was to discuss the sale of natural gas to residents of Coleman and Blairmore. The two visitors were interested in obtaining a franchise to handle the sale of gas in this area as well as handling all of the installations of gas lines in the area. It was the opinion of the men that the Pass would be serviced with gas within the next two years. With much of the information at present being indefinite, no specific action was taken at the informal meeting.

Consolidated School Dist. No. 78 Hold Elections

BLAIRMORE.—By the time the call for nominations in the new Consolidated School District No. 78 closed at the meeting of electors held in the Turtle Mountain hotel at Frank Tuesday evening, 11 nominations had been turned in to Dr. K. H. Thomson, returning officer. For the district of Blairmore nominations for Joe Dziedzic and T. J. Costigan were received. By reason of its status of a town, Blairmore is entitled to two board members and Mr. Dziedzic and Mr. Costigan were thus elected by acclamation.

For the district of Hillcrest the nomination of Mrs. C. McNeil was received. Hillcrest is entitled to one board member and Mrs. McNeil is elected by acclamation. For the district of Frank nominations were received for V. J. Horvath and L. J. Margatak; for the district of Bellevue nominations were received for Joe Christie and Dan Quintillo; for the district of Mohawk nominations for John Dugdale and J. Don Hayden were received. Election for district trustee will be held in each of these school districts. The establishing order called for one board member to be elected at large. Nominations for this position were received by J. S. Hyslop of Bellevue and D. H. McRae of Blairmore and an election will be held for this position.

Senior Choir Honor Departing Member

Following the regular practice the Senior Choir of St. Paul's United Church, under the leadership of Mr. B. Bond, gathered in the Clubrooms where Ed Ledin, who is leaving to take a position at Red Deer, was honored.

Mr. Bond, on behalf of the choir, presented Ed with a gift and expressed regret at losing a faithful choir member and worker and stated the good wishes of all accompanied him and wished him every success in his new position.

Ed very ably thanked all for their kind wishes. He will be missed here for his cheerfulness as a clerk in the Post Office and his interest in community activities.

The only Canadian railway running north of the 60th parallel is the Yukon and White Pass connecting Whitehorse and Skagway, Alaska.

C.N.P. Retail Merchants Vote No Late Closing Of "Pass" Stores

Well over forty merchant members of the Crow's Nest Pass Retail Merchants' Association attended a meeting in the Grand Union Hotel in Coleman Wednesday evening. Main item on the agenda was the suggestion of keeping stores open one late night per week the year round. After considerable discussion a vote was held which saw a great majority of those present reject the suggestion.

The problem of "shop lifting" in local firms was brought up and it was disclosed that there was a considerable amount of this practice.

An organized effort will be made by merchants to curtail this practice and anyone caught will no longer be shown mercy. It was decided to hold a special meeting in the near future when Corporal Murray of the Blairmore detachment of the RCMP will be present to give a talk on bad cheques and how they are passed.

Auditors for this year will be William Harvey of Bellevue and Don Thornton of Blairmore, who will send their reports to the registrar of companies in Edmonton.

Coleman Beats Michel

The Coleman Grands extended their winning streak to five games by dumping the Michel Coal Kings 9-5 last Wednesday night.

The win put Coleman in second position in the A. B. C. M. League, two points behind the Great Falls Americans who have won seven games and lost three, while Coleman has won six and lost only one.

Barry Fraser led the Coleman scorers with three goals, while Scodellaro and Tymchyna notched two each with singletons going to Bosetti and Cerny.

Michel divided their five goals between two players — Serafini scored a hat trick while Turlyk notched the other two.

A fair crowd was on hand to watch the cleanly played contest in which only three penalties were handed out, two to Michel and one to Coleman.

Frank Mitchell in the Michel nets held the Coleman crew down to nine goals and was easily the best player on the ice for the Coal Kings.

Coleman's next home game is on Wednesday, February 6th against the battling Fernie Rangers. Should Coleman win this contest the stage would be set for a real battle on Sunday, February 10th at 2 p.m. when the Great Falls Americans are here again. The league leadership will be at stake and should provide some good rugged hockey. This is a game you should not miss if you are a hockey fan — it will be a real thriller.

LEGION HOLDS POLIO BINGO

A fair crowd turned out for the Legion Bingo in the Clubrooms on Friday evening. The Bingo which was a joint effort of the Canadian Legion and the Ladies' Auxiliary will turn all proceeds over to the Polio Campaign, which is currently underway in Coleman.

Lucky winners for the evening were: Mr. P. Perogotti, Mrs. O. Sudworth, Mrs. J. Chalmers, Mr. D. Johns, Mrs. P. Smith, Mrs. S. Taramba, Mrs. M. Clarke (2), Mrs. E. Campbell, Mrs. E. Guerdon won the consolation. Mrs. J. Kostelnik won the door prize.

One of the few men to see Century Sam when he made a startling appearance early last year, Bob Banks now draws him for the rest of the world. The sixty-like little prospector claims that he is a "left-over" from the big British Columbia gold rush one hundred years ago. He told Bob Banks that he would come out of his secret Cariboo home again in 1958 to celebrate B. C.'s 100th Birthday Party, the meantime Banks is turning out many cartoons of Century Sam for use of the B. C. Centennial Committee to help publicize the 1958 Centenary. Bob Banks is a well known commercial artist in Vancouver. He is a graduate of the Vancouver School of Art and has gained recognition for his oil paintings as well as illustrations which have appeared in 12 published Canadian books.

Committees To Handle Refugee Problems Formed

A meeting of the Hungarian Refugee committee, recently formed, was held in the offices of the NRS in Blairmore to form committees to look after the needs of refugees expected to come into the Crow's Nest Pass area in the near future. Mayor Abousay of Coleman, chairman of the committee, presided.

A reception committee for each of the Pass towns was appointed and will comprise the Rev. Dean A. Anderson and the Rev. R. G. Thompson for Blairmore; the Rev. Henke and C. R. Ritchie for Bellevue; and the Rev. Fred Dykes and Rev. Rod MacAulay for Coleman. Dean Anderson will act as overall chairman.

Appointed to the housing committee were Mayor William Gray for Blairmore, Les Cousins for Bellevue and the Rev. J. S. Fleming for Coleman. The duties of this committee will be to accept offers for housing and accommodation of the incoming refugees.

The sick, rehabilitation and employment committee will comprise J. L. Coleman and J. S. Fleming for Coleman, and J. J. Kynin of Bellevue. J. L. Coleman, manager of the Blairmore offices of the National Employment Service office, will act as chairman of this committee.

The clothing committee was formed and comprised: Blairmore, Mrs. Ruby Mark; Bellevue, William Harvey, and Coleman, L. Saunders of the Salvation Army, who will act as overall chairman of this committee.

Arrange Depots
Depots were then arranged for the receiving of clothing and furniture for the refugees. In Bellevue the receiving depot has been set up at Harvey's store while in Blairmore the depot has not yet been set up. In Coleman the main depot has been set up in the Salvation Army Hostel where shelves are already being built to store and sort for the size clothing that is expected to be turned in for refugees.

An appeal is now being put out to all in the Crow's Nest Pass for clothing and furniture and any persons having clothing or articles they wish to donate are asked to turn them into the depots or if the article is too large to bring in arrangements can be made for this by telephoning Mr. Lote. To rehabilitate the refugees every type of household article is needed including pots, pans, dishes, tubs, stoves, tables, chairs, clothing, bedding and almost every article that is needed in a home. Several homes have already been offered free of charge for families of refugees.

Should any person wish to take in a family or a refugee for any length of time, they are asked to contact any of the members of the housing committee, who will take immediate steps to complete arrangements.

A number of interpreters able to speak the Hungarian language are also needed and those persons that wish to furnish this service are asked to contact Mr. Lote or Mayor Abousay as soon as possible. Should any persons in the Crow's Nest Pass have relatives in Hungary who wish to bring them to Canada, they too, are asked to contact Mr. Lote who will undertake to complete arrangements through the committee.

WINTER FETE OPENS FRIDAY, BLAIRMORE

Plans are progressing this week for the Crow's Nest Pass Winter Carnival scheduled to get under way Friday and continue through Saturday and Sunday when the Crow's Nest Ski Club will wind up the affair with its annual ski tournament.

Plans call for the fete to get under way Friday evening at the local arena when the Pass mayors will open the events. Plans for an ice show are being made in the arena and a dance is scheduled to be held at the Turtle Mountain Playgrounds.

Saturday the Ladies' Curling bonspiel will get started in the local arena and will continue until Sunday. Judging of the snowman and window decorating contests will be made Saturday afternoon and hockey games are planned for Saturday night. The local ski club will present a display of flare skiing on the local ski hill at 7 p.m.

On Sunday special church services will be held at all churches and the ski meet will start with finals in the afternoon. A banquet at Pat's Chop Suey cafe will be held Sunday evening when ski prizes will be awarded. The crowds will then proceed to the local arena where the crowning of the new queen of the Winter Carnival will be held. Other entertainment is being planned to round out the evening.

Canadian Legion To Conduct Polio Campaign

At a well-attended meeting of the executives of the Canadian Legion and Ladies' Auxiliary held Saturday afternoon plans were finalized for the Polio Campaign which will start Friday, February 8th.

The town has been zoned and each area under the direction of a captain will be canvassed over the weekend. Captains of the various zones are:

Business area — P. Smith.
Second Street—Mrs. G. Ingram.
Third and Four Streets — Mrs. J. Anderson.

Fifth and Sixth Streets — Mrs. E. Campbell.

Top of Hill—Mrs. M. Parry.
Grantfentown—Mrs. J. Troz.
East Coleman—W. Bazuk.

Blairmore Road—Mrs. W. Ford.
West Coleman—Mr. R. Crippen.

Willow Drive—Mrs. G. Juhala.
Carbondale—Mrs. J. Myslicki.
Lime Kins and East Kins—Mrs. L. Schultz.

All residents are urged to support this very worthy cause and give as generously as they have in the past so that Coleman may again live up to the high standards they have accomplished in former years.

United Church Men's Club Entertain Ladies

On Friday evening January 26 the Men's Club of St. Paul's United Church entertained the ladies at a Burns Night dinner party in the clubrooms.

The menu included Scotch broth and Scotch stew to replace the traditional haggis, which none of the chefs felt had sufficient knowledge to attempt.

Scotch songs and dances were featured for the rest of the evening which everyone thoroughly enjoyed. At the close of the evening everyone left feeling that they had really enjoyed the Burns Night festivities.

More production need

(The Sun, Swift Current, Sask.—November 14, 1956)

Most people, in view of our export troubles and piling up of grain surpluses, might pooch the idea that Canadian farmers will have to produce more to feed our expanding population, and that Canadian requirements in the food line were rapidly catching up to our agricultural production. But that is what experts think. And this thought was given yesterday in an address to 125 boys and girls in Toronto at the 25th National 4-H Club Week.

Increases will be necessary in fresh vegetable acreage, small fruits and tobacco, as well as the feed grains, all kinds of roughage and livestock. Increases could come from increased yields which mean a considerable increase in the type of skills you have been learning in 4-H Club work," declared Dr. H. L. Patterson, Director of Farm Economics for the Ontario Department of Agriculture.

"Agriculture has changed more in the last ten years in Canada than it did in the previous fifty," he said. "Especially in the business features of farming. This has been caused by our rapid industrial development which is proceeding faster in this country than anywhere else in the world. Canada now ranks fourth among the nations in the value of goods traded and sixth in income from manufacturing. The industrial upsurge has resulted in considerable change. Population has increased and will continue to do so in industrial areas with strictly rural population declining."

The inevitable result of this swing, thinks Dr. Patterson is less farm workers and more machines of a specialized nature. This is already beginning. Tractors increased 150 percent in the ten years between 1941 and 1951 while grain combines increased by 374 percent. "This is the logical outcome," Dr. Patterson said, "of the fact that while farm machinery, gas and oil have less than doubled."

Mechanization also means adjustments, in Dr. Patterson's view. Farming can no longer be self sufficient. The farm operation requires more cash income and the size of the farm unit is becoming larger. The average area per farm increased from 236.8 in 1941 to 279.3 in 1951. If farmers are to keep up with the expected 60 percent increase in population in the next 20 years, they must adjust to changing conditions as they have done in the past ten.

Everybody's business

(The Record, Rimbey, Alberta—Nov. 23, 1956)

There was a time when business was called private, and some owners believed that what they did was no one else's concern. That day is gone forever. Today, business everywhere needs friends and they can't make friends by hiding behind a brick wall. You've got to come out in frint and say hello to the neighbours—AND MEAN IT.

Free enterprise is a friendly business, and the world of free enterprise is a friendly world. Freedom at work is just as important as freedom at play.

The opinion of the average citizen regarding our free enterprise system is founded on all the things with which he comes in contact every day, the business actions of the people with whom he does business, and the public with whom he lives.

We must never forget that, talk and advertise though we do, telling of our fine way of life, if the individual does not feel he is getting a square deal at his work, if the companies with whom he does business treat him unfairly, the time and effort are being wasted.

Freedom of life and enterprise becomes a mockery if trust and confidence is disappointed. How many persons lose faith in our way of life when they are ill-advised by a minority who would, and do, take advantage of their inexperience in freedom's fold. Too often, ruthless persons, with only their own interests in mind, take advantage of those who should be learning to enjoy our free system and understand its few obligations.

This system of free economy and representative government has been responsible for the growth of our country and its resulting greatness. Let us hold on to it with a firm grasp in our own community.

The liquor vote

(Empire Advance, Virden, Manitoba—November 14, 1956)

Does Virden want the right to have five additional outlets for the serving of alcoholic beverages?

That is the question which the electors of the town will answer with their ballots next Tuesday, November 20th, when they vote on Virden's liquor by-law.

It is a question which each elector will have to decide for himself before he goes to the polls in the Legion Hall. It is a vastly important question, one which merits each elector making a special effort to go to the polls.

Even if Virden goes "wet" that does not necessarily mean that all five, or indeed any of the five outlets will be licensed here for quite some time. Premises to be licensed have to be of a high standard set by the Manitoba licensing board and it is understood that the board will move on a "go slow" basis in granting licenses.

But the voters will determine whether or not additional outlets are to be legal within the limits of the town and of what type these are to be.

Electors are reminded that in marking ballots only an X is to be used in the spaces provided. Any means of marking the ballot will result in a spoiled ballot.

Next Tuesday's referendum could result in a marked change in the social habits of the town. That is why each and every elector should go to the polls. The vote is a right and privilege; it is also a duty not lightly to be disregarded by good citizens.

Bushel to hundredweight

(The Red River Valley Sun, Altona, Man.—November 14, 1956)

Grain trading organizations throughout western Canada have been urging the Board of Grain Commissioners for Canada to abandon the bushel as the official measurement for grain, and replace it with the hundredweight measure.

At a meeting of shareholders of Co-op. Vegetable Oils Ltd. at Altona last Saturday a resolution was unanimously passed favoring the adoption of the hundredweight method as the official measurement for grain. The wheat pools and other grain trading organizations have passed similar resolutions, we understand.

D. G. McKenzie, chief commissioner of the Board of Grain Commissioners, Winnipeg, told the annual convention of the United Grain Growers in Calgary last week that the abandonment of the bushel as an official measurement for grain and its replacement with the hundredweight is technically possible.

Mr. McKenzie said that those seeking the change feel the bushel as a unit of measure is out of date, cumbersome and of no real use in judging the value of grain. Switching to pounds and hundredweights would cut out no less than 26 conversions from bushels to pounds and from pounds to bushels by grain officials from the country elevator through the terminals.

All export business is done by the ton or hundredweight basis and endless time is spent in converting figures. At the Vegetable Oils plant soybeans and corn are purchased by the bushel, sunflower seed and rapeseed by the pound. All products are sold by the pound and all records throughout the plant are in pounds. Conversion to the pound and hundredweight basis would have much time and reduce the possibility of errors.

We strongly urge the Board of Grain Commissioners to make this change as soon as it is feasible to do so.

E.I.D. needs beet sugar factory

(The Bulletin, Brooks, Alta.—November 22, 1956)

Sugar beet growers around Lethbridge recently received \$4,000,000, being the first payment on beets delivered to factories there this autumn. The money went to 1,583 sugar beet growers who produced 465,000 tons of beets on 36,210 acres. The 1956 crop is expected to run around 17.2 percent sugar content so that growers will receive additional payments amounting to around \$3,000,000.

The Eastern Irrigation District missed obtaining a sugar beet factory through some miscalculations. That was a most unfortunate happening as growing tests here had demonstrated that a greater beet tonnage per acre, with a higher sugar content, can be produced in this district.

Some time in the future another sugar beet factory will be erected in Southern Alberta. The Eastern Irrigation District should plan to have a good case presented for its location here. There will be keen competition from other irrigation districts, but an objective is never gained without a struggle.

The Eastern Irrigation District is a soundly based project and every facility is here for the production of the beets and for the establishment of a processing factory.

Ancient drying oven for grain discovered

Archaeologists have uncovered the remains of a drying oven used by villagers near Hama, Germany, to save grain from inclement harvest weather 1,800 years ago.

It worked on the same principle as driers which have been used to preserve grain this year, with heat from the fire being channelled over the grain as it rested on a bed of pottery fragments.

Police equipment

Municipal police forces in urban centres, district municipalities and townships of 4,000 population and over in 1955 were equipped with 1,071 radio cars, 143 non-radio cars, 490 motorcycles and 125 other types of motor vehicles.

"YOU TAKE AN IRONING BOARD DOWN TO PUT IT UP," SAYS MARGIE H. BRONSON, Almo, Idaho.

Greenland moves to save musk ox from extinction

One of the world's rarest animals, the musk ox, is reported to be in danger of extinction in its chief home, northeast Greenland.

According to a report from Danmarks, Greenland, many of the animals, which look something like a cross between a small ox and a sheep, have perished of hunger. Their numbers have been declining steadily in recent years.

The cause of the animals' plight is believed to be the milder climate. In recent years, warm winds after the first snows followed by cold weather have caused the snow to melt and then be replaced by ice. The musk ox as a result have been unable to scratch their way down to the vegetation below on which they live.

Another fact causing alarm is that no calves under one year old have been observed this year in the Danmarks area. A sample count in one district disclosed 26 but musk oxen to one cow.

The number of musk oxen in northeast Greenland is not known, but it is the only area left in the world where they are relatively plentiful. They also exist in a few places in the Canadian Arctic.

Greenland authorities are considering placing new restrictions on hunting the animals to try to prevent them becoming extinct. At present, hunters are allowed to kill a maximum of six animals each year. This may be reduced to five.

Public health methods of malaria control helped reduce Ceylon's death rate by 35 percent in the past three years.

IN THE HOME WORKSHOP

—WITH 1000 PATTERNS

Snack bar
A SNACK BAR for the birds is a gift for your list. Even if there is not time to make it before Christmas, send for the pattern and be ready for winter days.

ahead. Pattern 208, which gives actual-size cutting guides and directions will be mailed for 35c. This pattern is one of five in the Bird House and Feeders Packet No. 1 for \$1.50.

The real charm of these lawn cutouts is in the proportions and poses of the figures. The painting design too plays a large part in the final effect. The secret in painting life-like figures so that to the passerby they appear three-dimensional, is in keeping clean sharp edges where the colors join.

21-INCH LAWN FIGURES

FUTURE OF THE SUNFLOWER CROP IN WESTERN CANADA

The future of the sunflower crop in Western Canada depends not so much on the features of the crop itself as on the farmers' attitudes to row crops in their farm operations.

According to E. D. Pitt of the Modern Experimental Farm, Canada Department of Agriculture, there is little doubt that sunflower varieties will emerge from breeding programs which will produce economic yields over all the more northerly agricultural areas of the Prairie Provinces. If there is a place, or a demand develops in Western Canada for a row crop, then sunflower will fill that place.

Oilseed sunflowers were first produced in Western Canada in 1945 as a wartime emergency. In that year about 5,000 were grown over Manitoba and Saskatchewan. In subsequent years the production shifted almost entirely to the Red River Valley of southern Manitoba. More recently there has been an expansion westward out of this section.

At the present time short varieties suitable for combine harvesting are being grown. In the early years the varieties Monmonite and Sunrise were produced. In 1947 these were replaced by a better yielding variety Advance, and in 1955 slightly over 60 percent of the acreage was planted to Beacon, a newly developed and resistant open pollinated variety. In recent years there has been a returning trend towards the old variety Monmonite for use of its large seed in the confectionary trade.

The acreage of sunflowers in the west has fluctuated considerably since 1945 when 8,500 acres were grown. The next year the acreage was increased to 23,000 and continued to increase until in 1949 there was a total of 60,000 acres of sunflowers under cultivation in the west. This acreage followed two years of high yields and high prices. The decline to 3,500 acres

is not difficult if you follow a few simple rules in the selection of materials and in their use, as given on the pattern. The figure is traced directly to the wood and then the outlines where the colors join are traced. Perfect results are assured. Nothing is left to guess work on these two patterns which are 35c each.

AUTOS BOOST TIN INDUSTRY
"Tin Lizzie" may have been a humorous nickname for the early motor cars. But automobiles are now a boost for the tin industry in that two billion motor oil cans were used in 1955.

LOSE A MINUTE—SAVE A LIFE

Canada's resources expansion tied to airplane use

By LEON V. STONE

Exploitation of Canada's natural resources and development of its industrial strength in a land of vast distances, frequently rugged terrain, and relatively sparse population, would have taken many more decades without the benefits of the airplane. C. R. McGregor, president of Trans Canada Air Lines, told the 28th annual Conference on Distribution.

Mr. McGregor forecast continued growth of its economic strength of both Canada and the United States and added that the air transport industry is preparing "to meet this challenge of the future."

Today Canadian air carriers are transporting close to three million passengers yearly as compared with less than 600,000 in 1946, a five-fold increase. Similarly spectacular increases have been made in the carriage of mail and cargo, he said.

Turning the economic spotlight on France, Henri E. Blanchenay, manager of the Societe Generale, New York agency, described how a revolution in productivity had given economic stability and an economic "new look" to that country.

M. Blanchenay told how mounting productivity "makes France the envy of many European states that have much more stable processes of government." This modern picture of France was brought about by "ruthless scrapping of outdated plants and techniques; wide-scale integration and consoli-

dation of small plants and vast re-equipment."

He told of the building of huge dams and power systems, of the re-equipment of the national railways to make them "unarguably the most efficient in western Europe," of the re-equipment of old industries and of the establishment of new ones.

"Productivity" played an important role in these achievements, M. Blanchenay pointed out. "A great many productivity missions visited the United States. They were taken to productivity. They were shown productivity at work. . . . Our workers, our engineers, our executives, our bankers, even our politicians were quick at grasping the beneficial effects of that modern industrial creed—productivity."

"With more than 500 million dollars in sales to this country, France has not yet exhausted her potential as a fancy word, almost already started giving a 'new look' to her dollar exports."

Credit selling hailed

John G. Forrest, financial and business editor of the New York Times, referred to the word distribution as "a fancy word, almost an abstraction." Turn the word over, he advised, "The other side is consumption. By consuming, the missing link in the chain from raw material to end-use is completed."

"We own a good deal right now for things we've bought that we haven't paid for. Business has come up with all sorts of delayed payment plans so as to make it possible for goods to move into consumption."

"Last June, to cite a month when some figures were for a roller-coaster ride, installment credit went up by 299 million dollars to a record of 23.9 billion dollars. Automobile credit alone went up by 201 million dollars. Personal loans went up by 74 million dollars. Charge accounts, store payment loans, and other types of credit rose 220 million dollars. The total of all consumer credit at the end of the year's first half went up a record 37.1 billion dollars."

"Without that credit we couldn't keep on going. It was credit selling that pulled us out of a downturn at the end of 1954 that might well have gone on to become a tailspin."

"Credit is a valuable tool for the economy, if it is used intelligently. That's why I suggest we set to work—there's no time to lose on a real program to increase consumption."

Farm efficiency has risen so rapidly and so far that 10 percent of the population now engaged in agricultural work are able to provide food and natural fiber to meet the needs of the entire population whereas not many years ago 40 percent of the work force was required to do the same things, J. G. Taggart, deputy minister of agriculture at Ottawa, Canada, told the conference.

Farm situation viewed

Not only the farm population but the number of farms themselves is declining in both the United States and Canada, the speaker said. This decline in farms has resulted in outright abandonment in some cases as well as many consolidations of smaller units into larger ones which is so far as acreage is concerned has tended to maintain the production potential at or above former levels.

Atomic energy and automation hold the promise of unlimited power and unlimited automatic control, creating a new industrial and scientific parameters with new potentials, new problems, and new responsibilities, George L. Ridgway, consultant on public affairs, International Business Machines Corporation told the conference.

FARM LOANS

The Twenty-seventh Annual Report of the Canadian Farm Loan Board for the year ended March 31, 1956, has just been issued.

The Board is an agency of the Government of Canada, established for the purpose of making first mortgage loans to Canadian farmers. In the year ended March 31, 1956, 2,057 loans for a total of \$8,309,650 were approved as compared with \$8,225,500 in the previous year. The average loan was \$4,040 as compared with \$3,835 in the previous year. At March 31, 1956, there were 18,931 first mortgage loans and 2,389 second mortgage loans outstanding for a total of \$14,958,136, being an increase of \$4,537,800 over the previous year. Collection experience continues to be satisfactory and 87 percent of the total due for interest during the year had been paid by the end of the year. Of the total of \$3,623,515 of principal repaid during the year over 54 percent was received in payment of principal not yet due by the terms of the mortgage contracts.

Changes in the Canadian Farm Loan Act made at the last session of Parliament designed to widen the field of operations by increasing the maximum loan limit from \$12,000 to \$15,000 and the maximum loan term from 25 to 30 years did not come into effect until after the close of the fiscal year and are not reflected in the Report. Board officials state that there has been a substantial increase in the demand for loans in the first six months of the current year and that loan approvals for this period are 45 percent greater than in the corresponding period last year, due in part to the larger loans now permissible under the amended Act.

Eskimos raise their own geese

Arctic and sub-Arctic regions of Canada are natural nesting places for several species of wild geese. The Eskimos living in these areas shoot geese for food as required. But history was made this year when domestic geese were raised by Eskimos.

On June 8, 35 goslings of the Pilgrim breed were air-borne from Ottawa to Fort Chimo, Quebec, in the Ungava Bay region. Under the supervision of a representative of the Canada Department of Agriculture an Eskimo was assigned to feed the goslings. This was done in the village of Fort Chimo for a period of three weeks. In addition to chick starter and mash, some native grass, caribou moss and other vegetation was placed before the birds during the third week before turning them out to full pasture. The goslings were then moved by boat to False River, where there was an area free of Eskimo dogs. Here the native range, unlimited in size, consisted of a large grassy tidal flat with a very rugged stony and treeless terrain in the background. The geese were released and there they tended themselves during the daytime. At night the Eskimo attendant herded the geese into a snow-fence enclosure and fed them just a sprinkling of grain. No grain rations were available after the first week on pasture.

The geese were left at False River for exactly 10 weeks, and were then brought back to the settlement at Fort Chimo. Even after a two-day boat trip their average weight was 7.5 pounds. At Fort Chimo the geese were confined once more and fed grain for another three weeks. At this stage they were 16 weeks old and averaged 11.3 pounds each, and some geanders weighed slightly over 13 pounds.

Twenty of the geese were killed and proved entirely satisfactory to the Eskimo palate. The remainder are being kept at Fort Chimo where production tests will be made and the best conditions for carrying the geese through the winter will be studied.

This relatively small test shows that Eskimos can raise geese at Ungava Bay and it is probable that further experiments will be undertaken next year.

U.S. livestock situation

The United States Department of Agriculture states that meat animal prices are likely to continue above the relatively low levels of a year earlier for the rest of 1956. Hog prices, though declining seasonally as marketings increase, will stay above the fall prices of 1955 with the greatest difference late in the year.

New Zealand scientist visits the U.S.S.R.

The Canadian Foreign Trade Service reports that Mr. N. H. Taylor, Director of the Soil Bureau of the Department of Scientific Industrial Research, New Zealand, will visit the Soviet Union. Mr. Taylor's visit to the Soviet Union is considered to be of particular importance because the broad classification of soil types in modern soil science is based on the classical section running from the tundra to the semi-arid steppe in the Soviet Union.

SWEETER SONG

Although sold as canaries sing, HERE A LONG TIME in- their songs are not as beautiful as have existed for about 200 million those of the tame canaries. years.

Ticklers

By George

"Hey sis! Your basketball friend wants to see you."

RIVETS

ALSO NECESSARY

During a period when unemployment was prevalent, I was working in the wholesale district in Oakland. I would arrive at my office in time to see girls and boys on before-school errands to the nearby produce markets. They would carry home armloads of bruised fruit and not-fresh-enough-to-sell vegetables. The produce merchants permitted needy to families to salvage these discards.

A serious little trio drew my interest. The lad and older girl were dragging a sack of vegetables but one little maiden walked alone in front, protectively holding a bouquet of broken-stalked and wearily-looking blooms, evidently reclaimed from the wholesale nursery throwaways. "What have you there, honey?" I asked gaily. Perhaps the child felt that I was reproaching her for having no edibles. She looked at me thoughtfully, as she answered simply, "Mother needs flowers, too!"

FAN FLUTTERED 4,000 YEARS

The fluttering hand fan has concealed the blouses of shy women 4,000 years. The familiar folding fan was invented in Japan about 670 A.D., introduced into China in the 10th century, and transported to Europe in the 16th century.

Quick Canadin Quiz

- Which of Canada's provinces has the smallest area of occupied agricultural land?
- What percentage of Canadian households is equipped with mechanical refrigeration — 28 percent, 49 percent, or 76 percent?
- The first canal connecting the Great Lakes and Atlantic via the St. Lawrence were opened in what year?
- What proportion of Canadian families own their own homes — one-quarter, one-half, or two-thirds?
- What is the principal reason for taking a 10-year census in Canada?

ANSWERS TO QUICK QUIZ

- To adjust provincial representation in the House of Commons. 3. In 1848. 1. Nfld. 4. Two-thirds. 2. 76 percent.
- (Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

Linen is made from the flax plant.

Here's the Answer

Recipe for a good school

Place not more than 30 superior children, yours and your neighbors', in an attractive classroom in a safe, well-planned building with a teacher who is capable and well prepared. . . . Blend in plenty of good books and other teaching aids. . . . Add safe school buses and ample space for play. . . . Leaven with a salary scale that is fair and decent, a good plan for teacher-retirement and a touch of real appreciation by the community.

Season with your personal interest, co-operation, and support. Mix well for one school year. Guaranteed Results: Happy, well-taught children. Serves one whole community very high in the protein of good citizenship.

—National Education Assn.

Liquor Act Doesn't Specify Clubs In Prohibiting Sale (Albertian)

A loophole in Alberta's liquor laws allowed a Calgary club a clear bill of health in police court Friday when a charge for selling beer on a Sunday against the Army, Navy and Air Force Veterans' Club was dismissed.

When all evidence was heard it was noted by lawyer J. R. Mc-

Colough, acting for the club, that the Alberta Liquor Control Act specified a person or corporation may be penalized for such an act, but makes no mention of a club. John Bennett Collison, inspector for the Alberta Liquor Control Board, testified he received an anonymous complaint about the club Sunday, November 4, 1956, about 2:30 p.m. When he investigated he found conditions warranted sending for the police, in his estimation.

A dart game was in progress on

the first floor, he said, and although there was no evidence that beer was either being consumed or sold, empty glasses and whiskey bottles littered several tables.

Sold In Lounge

In the downstairs lounge open bottles of beer were being sold and the room was crowded with men.

While he was waiting for the police to arrive an announcement was made over the public address system stating the bar would close in five minutes and open again later in the afternoon.

When police arrived they were obstructed at the door and a second announcement was made over the public address saying "clear all rooms and ditch everything, the police are here."

Then the door to the lower floor was locked and "no one seemed able to find the key." When it was re-opened, much of the evidence was cleared away, but some men were found drinking bottles of beer in a wash room off the lounge.

Doorman "Troublesome"

Sgt. G. W. Kemp stated when he arrived the doorman was troublesome. He was arrested.

When Sgt. Kemp arrived back at the club premises after taking the man to the police car, the downstairs room was locked. When it was re-opened there was no one there. However, the air smelled heavily of beer, he said.

Then he heard male voices coming from the ladies rest room. Upon investigation three men were found there. He confiscated five bottles of beer they had with them.

Sgt. Kemp said there was a club license issued by the Liquor Control Board pasted on the wall, authorizing sale of beer on weekdays.

William Tanner, of 26 Bowness Road, who was charged with possession of beer, testified he did obtain beer at the club on the Sunday specified — but that he had paid for it weeks before.

He was a member of a dart tournament sponsored by the Dart Club, he said. Each member put in some money for prizes and two bottles of beer for each player.

The team captain issued tickets and the tickets were exchanged for the beer at the Army, Navy and Air Force Veterans' Club, he said. "It was an open dart tournament," he said, "and could include anybody in Canada."

The dart club "ran the tournament" and arranged for providing the beer, he said.

"You'd just be convicting a name," said Mr. McColough. "Who would really be convicted?"

In the penalties section of the Alberta Liquor Control Act, "it says nothing about a club. There is no penalty and information must be quashed," he said.

Local Girl Feted At Bridal Shower

On January 17th at the Elks Hall in Coleman a bridal shower was held for Mrs. Ron Wong, R.N. (nee Francis Kowenko) with over a hundred guests present. On entering the hall Francis was presented with a lovely corsage, a gift of Alice Buckna and pinned on by her sister, Mrs. A. Panek. Mrs. Kowenko, mother of the bride, was also presented with a corsage and this was pinned on by Mrs. Danidovich. Miss Helen Morris played the piano as Francis was escorted to the head table. Whist and bingo were played, honors going to Hilda Caroe, Mrs. Oswald and Mrs. Saroff.

The bean guessing contest was won by Olga McDonald and the door prize by Miss Helen Waurecan.

A lovely lunch was then served by the hostesses after which a purse of money was presented to Francis by Anne Vasek so she could purchase a washing machine for herself. Then she was presented with a pink basket filled with many beautiful gifts, also a Sunbeam Mixmaster, a gift of the hostesses.

Francis then very graciously thanked everyone for the lovely gifts presented to her. The guest book was a gift from Joan Olynek.

AUDITOR'S CERTIFICATE
I have audited the accounts of the Coleman School District, No. 1216 for the year ending December 31, 1956, and have compared the said accounts with their relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs

of the School District according to the best of my information, the explanations given to me, and as shown by the records, subject to any qualifications mentioned in Auditor's Special Report.
(signed) T. A. COLLESTER,
Coleman, Alberta.

Date of Audit, January 22nd, 1957.

Coleman "Carnival Queen" Needs Your Support

The Coleman High School's C. N. Pass Carnival Queen needs your support if she is to win in the annual Queen Contest being sponsored by the Blainmore Board of Trade. If Colemanites wish to see Miss Dancolene represent the Pass at the Banff Winter Carnival we must support her by buying those votes now. Time is short!

Let's go folks! Show the "Pass" we can do it.

I see where other Pass towns are holding bingos to support their contestant. Let's not drag our feet. Remember the High School Students Union receives over 50% of the ticket sales to further their activities and this is money well spent. The Coleman Board of Trade urges all Coleman people to support our Queen Contestant.

School Principal Leadership Course

A leadership course for School Principals will be held, for the second successive year, in connection with the 1957 University of Alberta Summer Session.

Directed by the University, it is essentially a co-operative venture of the Alberta School Trustees' Association, the Alberta Teachers' Association, the Alberta School Inspectors' Association, the Department of Education and the Faculty of Education.

It will run for three weeks, from July 8th to July 26th, and will take place at Concordia College. Attendance will be limited to seventy Principals sponsored by district, divisional and country school boards. There will be general discussions on the latest developments in administration, supervision and educational leadership.

A most important aim of the course is however that school principals should receive help in dealing with actual problems which confront them in the course of their own work. They will have the opportunity of discussing their difficulties under the guidance of experienced administrators and of specialists in various educational fields.

In order that this aspect of the course should be fully prepared, it is proposed that school boards be in a position to name their course members by the end of February.

Aiding Epileptics

Editor Journal:
Sir: I am writing this letter to you in the hope that you will consider printing it in your paper as a service to the people suffering from, or interested in the work we are doing in connection with epilepsy.

On December 5, 1955, the Calgary Epilepsy League applied for and received its charter as a charitable organization, pledged to the cause of the sufferers of epilepsy. Although we are called "The Calgary Epilepsy League," we are not working for Calgarians alone. We are working for all those who are afflicted with this disability anywhere in western Canada. Our work is to promote an understanding and improvement of the conditions surrounding this disability in our communities. We are working to improve the educational, social and employment problems encountered by epileptics and thereby eliminate the mistaken theories that have been attached to it for ages past.

We of the Calgary Epilepsy League would like to hear from sufferers or interested persons. If you are interested please write: The Calgary Epilepsy League, 2436 4th Ave. N.W., Calgary, or phone 882220 or 870572.

W. D. TAYLOR,
Vice-President,
Calgary Epilepsy League.
Calgary.

WHEN THE PAYCHECKS STOP

coming in regularly, there is concern in the household. Old Man Winter has in the past brought about conditions that have resulted in scarcity of pay checks for many. He's being thwarted more often these winter days as result of co-operative efforts between private concerns, the federal employment authorities and the provincial government through its Department of Industries and Labour. The joint efforts of these groups, who started a "Do It Now" campaign, has resulted in a much higher level of continued winter employment.

AND SPEAKING OF PAYCHECK LACK, it often happens that adversity hits a family that brings about income and other lacks. It may be lack of money, or lack of responsibility, lack of mutual affection, any one of many possible lacks. The result is sometimes broken home, and cause of a bitter memory imbedded in a child's mind, that will stay there for life. It's always the children who suffer most.

WHEN THINGS BECOME DIFFICULT

the Department of Public Welfare can always help the Municipality to step in and care for the material needs of the kiddies. It can't replace the love and affection that exists between members of every family. So the efforts of this branch of the department, with the co-operation of municipal authorities, are today directed to maintenance of family units wherever possible. This is achieved by soliciting the sympathetic help of neighbors and community at large to help the stricken family help itself back up to a level of social and economic solidarity. There is, where necessary, financial help available by means of grants to the local authorities through the department. But more often than not it's the help of neighborly interest that is needed. Know anyone you can help to maintain his family as a family?

We'll be seeing you again next week, watch for us.

Your Future is Here... In Alberta

JOHN DIFENBAKER, MP for Prince Albert, with a group of western supporters wearing hat bands, "I vote for Diefenbaker", and lapel buttons, "I Like John". Left to right: Ariel F. Sallows, North Battleford; Mr. Diefenbaker; Dr. Lorne Connell, Prince Albert; Elmer Diefenbaker, the candidate's brother.

WHERE'S YOUR GAS PERMIT?—That's the question ringing through Western Europe, now that the Suez Canal has been closed. A Paris, France, gendarme, above, checks the gas rationing papers of a motorist. Each driver in France must have a special permit to be allowed to travel outside his residential area.

BABY "DOLLS" FOR CHRISTMAS—Christmas came early for actor Fred MacMurray and his wife, actress June Haver, when their adoption of seven-month-old twin girls was approved in Santa Monica Superior Court. MacMurray holds Laurie while Mrs. MacMurray holds Katie.

MOUNT SILVERTIP, in British Columbia, believed to be the area in which the TCA North Star crashed with 62 passengers and crew on board. The aircraft's pilot, Captain Allan J. Clarke, of Montreal, radioed Vancouver that he was returning after one of his engines failed. The plane was unheard of since. The RCAF search planes seeking the wreckage have been unable to locate the craft, a similar type to the photo below.

WOMAN CHAIRMAN—For the first time in Wall Street's 200 years, a woman will become chairman of the board and president of an important New York stock Exchange member firm. She is Mrs. Charles Ulrick Bay, widow of the former U.S. Ambassador to Norway. Mrs. Bay, who learned about high finance from her husband, took over December 1 as chairman and president of the 92-year-old company. She regards her achievement in the no-female's-land of finance as a victory for women. But she says, "It was inevitable this would happen, just as some other woman was the first judge, and still others the first engineer, and minister."

MORE FURS
Although Louisiana is one of the hottest states, it produces more furs than all of the rest of the United States put together.

NAMED AFTER DISCOVER
New Zealand was discovered in 1642 by Abel J. Tasman, a Dutch navigator, after whom Tasmania was named.

HELPFUL HINTS

When you're skillet-cooking liver and onions, cook the onions first in butter until they're soft and golden. Then draw the onions to one side of the pan and fry the sliced liver, adding more butter if necessary.

Mix a little orange marmalade with some cream cheese. Spread on split buttered toasted English muffins. Delicious with hot or iced tea.

NECESSARY QUALITY

Young folks who hope to reach the top brackets of management might be wise, to accept the warning that cleverness and ambition are not enough. Even more vital and necessary is the quality of integrity.

THIS WAY AND WATCH YOUR STEP—If you should ever get caught at the wrong end of a fire, you could have this sight confronting you. It's a victim's view of a rescue ladder, provided in this overhead shot of new fire equipment in St. Louis, Mo. The 100-foot ladder is easing up to the 80-foot level.

Industrial research in Canada by private industry in 1955

Out of nearly 2,500 larger Canadian companies covered in a recent survey of research-development expenditures by private industry, conducted by the Dominion Bureau of Statistics in co-operation with the National Research Council, 377 or 15 percent carried out research-development programs in 1955 and 235 other companies had facilities available to them for which they made no payments, according to a reference paper presenting details on the results of the survey released by the Bureau.

Outlays on research-development of the companies with active programs, as reported earlier, totaled nearly \$66,000,000 in 1955 and were expected to reach almost \$80,000,000 this year. Work conducted within the reporting companies accounted for \$52,000,000 of the 1955 total. About \$12,000,000 was spent outside Canada; 92 percent in the United States and 4 percent in the United Kingdom. Of the remaining \$2,000,000, spent in Canada, 58 percent went to firms outside the corporate structure of the reporting company, 7 percent to non-consolidated affiliated companies, 20 percent to commercial laboratories or consultants, and 15 percent to educational institutions.

Following are some of the results of the survey as presented in the reference paper:

Industries with largest research-development expenditures (also reported earlier) were: transportation equipment, electrical apparatus and supplies, and chemical products. Together these accounted for over \$35,000,000 of the 1955 total. Next in order were petroleum and coal products, non-ferrous metal products, and paper products, each over \$4,000,000.

By fields of activity, mechanical engineering accounted for 24 percent of total expenditures, followed by electrical engineering with 21 percent, chemistry with 20 percent, chemical engineering with 12 percent, and metallurgy with 9

percent. Next was physics, then medicine, with geology, agriculture and biology considerably lower in size of outlay.

Outlays for direct research were equal to 0.5 percent of the sales of all reporting firms. The highest proportion was 1.72 percent in the transportation equipment industry, followed by 1.34 percent in the electrical apparatus and supplies industry, 1.03 percent in the chemical products industry, and 0.80 percent in the non-metallic mineral products industry. These ratios varied widely, however, by size-groups within the industries.

The equivalent of 2,914 professionally-trained scientists were employed in 1955 on research-development projects by the reporting companies. This total comprised 2,154 with bachelor degrees, 341 with master's degrees and 419 at the doctorate level. Chemists accounted for 715, electrical engineers for 452, mechanical engineers for 445, and mechanical engineers for 444, to mention the four largest professional groups.

Fewer corn brooms

Fewer corn brooms but larger numbers of fibre and hair brooms were shipped from Canadian factories in 1955 than in the preceding year. The output of corn brooms amounted to some 237,100 dozen versus 248,000, and of fibre and hair brooms, 44,900 dozen versus 37,000.

Gardeners meet despite snow

Roses in December? No, but two new horticulture societies were organized in Manitoba this month and have programs planned for their first winter sessions.

The new clubs at Minnedosa and Dominion City were told by government horticulturist, F. J. Weir, that the Department of Agriculture encourages the formation of horticulture groups by helping pay for expenses.

Mr. Weir explained that the Department gives every club an amount of money equal to 50 percent of its membership fees up to \$100. The Department also undertakes to pay 50 percent of all prize money awarded at horticulture society shows. Mr. Weir said it will also supply judges.

The Minnedosa Society elected Dan Dugan president, with John Jury and Hugh Sanderson first and second vice presidents. For the Dominion City Committee, D. R. Thom will serve as president, Mrs. M. C. Shelby as vice-president and Mrs. G. Kyle as second vice-president.

Both clubs have planned winter meetings on gardening, home grounds competitions and horticulture shows.

No-cook peanut butter fudge

On some cold Saturday morning, let the children make this fudge for entertainment as well as refreshment! Blend together ½ cup peanut butter and ½ cup dark corn syrup in a mixing bowl. Add ½ cup plus 2 tablespoons non-fat dry milk solids and ½ cup plus 2 tablespoons sifted confectioners' sugar all at once. Mix all together first with spoon and then with hands. Turn onto board and knead until well blended and smooth. Press out with rolling pin about ¼ inch thick and cut in squares.

A heavy bomber has more power than nine locomotives.

Guide Us With Thy Perfect Light

WEEKLY BIBLE COMMENT

The quiet fields where shepherds watched their flocks by night is in strange contrast to the Palestine area of today.

One does not know at what moment the mild danger from wild animals against which the shepherds guarded may be replaced by the dire terror of explosive missiles overhead. Not even the Holy Land is safe from the horror and

destruction of so-called civilization that has turned its finest products of skill and invention to destructive uses.

It is a dark and terrible picture, and the one bright, ultimate contrast is in this Saviour, whose birth was announced to the shepherds in the field. Here was the song of Glory to God in the highest, and on earth peace, good will to men.

Here is something that has happened, and that cannot be undone. It is not a hope or an expectation. It is real. And it is the one bright light that shines in spite of all the darkness of history.

If the Christmas story could be destroyed, if the Jesus of history and the Christ of Christmas could cease to be, then, indeed, we might give up all hope and faith.

We might cease to pray or struggle and let the world go down in gloom and ruin.

But the Christ is real. The Christmas story is as precious as ever. As long as it is read and cherished, so long will there be a future for men and a hope of brotherhood. It is a time to think of all the great company of people who are living out that faith and hope today.

If there are teachings of hate and violence abroad and men who practice them, there are teachings of love and goodness, and a holy army of those who follow them. In the name and in the spirit of Jesus.

UNWANTED FLAVOR

Tainted milk or cream is sometimes so classified because of weed flavor. And the weed often most seriously responsible is the stink weed. Milk that is tainted is of no value to the farmer wishing to sell it, especially at cheese factories where it is rejected. Cream loses 19-25c per pound butterfat. That means from a five gallon can of cream which yields on an average 17.5 lbs. butterfat, the loss at 19c is \$3.32½ and at 25c \$4.37½, reports L. Silcox, Supervisor of Dairy Factory Inspection, Alberta Department of Agriculture.

Cows grazing on weeds following the aftermath of grain fields will often produce such off-grade cream. Provide sufficient pasture for them so that it will not be necessary for them to consume weeds. Other means of eliminating weed flavors are:

1. Removing or burning all screenings from around threshing machine settings before turning milk cows into the field.
2. Three or four hours before milking remove cows from weed-infested fields. The longer the interval the less danger of weed flavors in milk or cream.
3. Sometimes cows form the habit of eating strong weeds. By milking each cow into a separate pail, a tainted product can be detected through the sense of smell or taste. Keeping this product separated will prevent further contamination of other milk or cream.
4. Before adding separate milkings to the shipping can, carefully check the flavor of each.
5. Feed strong feeds such as bar pulp, beet tops, dry forage containing weeds, and chop containing weeds after milking.
6. Do not store strong smelling roots and beet pulp in the barn. Such feeds give off strong odors which cows inhale and impart to milk without actually eating the material.

Care in feeding and handling can mean the difference between first grade milk and cream or an off grade product.

Protect pigs from damp cold

With the approach of cold weather a swine breeder in Alberta has moved his weaner pigs into quarters which were very damp and clammy. Shortly after transfer to these new quarters several pigs died. Feed poisoning was strongly suspected by the owner.

A sample of feed and a dead pig were submitted to the Veterinary Laboratory for analysis and post mortem. Findings revealed that death was caused by pneumonia and too much dye in the feed. This and many similar cases prove the value and importance of dry well-bedded quarters for pigs during the fall, winter and early spring periods says A. J. Charnelski, Livestock Supervisor, Alberta Department of Agriculture.

Ventilation is of very great importance in a hog barn. Plans for construction of a cheap but effective ventilator are available from the nearest District Agriculturalist. If cold, clammy, damp air cannot be removed by ventilation alone, install a safe and efficient stove to provide extra heat for evaporating and lifting out the extra moisture from the barn.

Funny and Otherwise

Sandy said to his friend, Jack: "Jock, I'm a seek mon!" "Why dinna ye go to Doctor MacTavish?" Jock asked. "Is he na expensive?" "Aye, he'll charge ye three pound for the first vesit. After that it's but five shilling!" Sandy hurried over to MacTavish's office: an announced: "Weel, Doctor, here I am again."

"How well do you and your wife get along," a friend remarked to a man whose marriage was very happy. "Don't you ever have differences of opinion?"

"Oh yes," was the reply, "very often."

"Ah, that's the secret," said the husband, "I never tell her about them."

A gardener who took care of a director's lawn in Hollywood fell into the swimming pool. The owner left him there too—just so he could tell the boys at the studio his was the only place in town with a sunken gardener.

"I hear you're startin' to raise bees," I told O' Eary. "Yep," Eary said, "I don't want to miss nothing—and I've been stung every other way!"

If you make a right turn from a left hand lane, you are probably just careless and reckless—and not what the driver behind has called you.

"Just think, Pat," the sailor's superior admonished during a morning-after session, "if you would only stay sober, you might become a second officer like me, instead of just a common sailor."

"Second officer, huh?" muttered the young seaman.

"Yes," his adviser replied, "and wouldn't that be worth staying sober for?"

"Hivens no!" Pat shouted. "When o'm drunk, o'm an admiral!"

It was a stormy evening. The wind was blowing sheets of rain against the windows.

"Mommy, it is raining too hard for me to go to the corner and mail this letter!" asked Susie.

"I should say it is," responded her mother. "It isn't a fit aught to send a dog out. Let your father go mail your letter."

Mr. J. Paxton has returned from a holiday spent at Vancouver. He stated the weather there was fine and he enjoyed the holiday very much.

...
Mr. and Mrs. J. Misson of Calgary visited with their son and daughter-in-law, Mr. and Mrs. G. Misson.

Word has been received of the passing away of Miss Myrtle McRea, sister of Mrs. S. Murdoch, at Vancouver on Fri, Feb. 1st. Mrs. Murdoch left by bus for Nelson where she boarded a plane for Vancouver and arrived there a day before her sister passed away.

...
Correction - In an item of our Jan. 16 issue, with regards to the ladies who sang Carols at the Ukrainian night in St. Paul's United Church, the name of Mrs. Rose Bracovsky was spelt incorrectly, and should have read Mrs. Steve Bracovsky.

...
Master Clarence Westley entertained a number of his small friends on the occasion of his seventh birthday. A lovely cake centered the dinner table and all joined in wishing Clarence many happy returns of the day.

Friends of Mrs. Ethel Wells of Fort Albert, B.C., will be sorry to hear she will be a hospital patient for six months. She is suffering from rheumatic fever.

QUIET WEDDING UNITES COUPLE

A quiet wedding was solemnized in the United Church manse at Coleman on Saturday afternoon, January 26th when Carol Evelyn, daughter of Mr. and Mrs. Gabe D'Amico of Coleman became the bride of Wilfred John Cerney, son of Mr. and Mrs. Joe Cerney of Frank. Ernie Velprava of Frank and Joan Weber of Calgary attended the couple.

A reception for relatives and friends was held at the home of the bride's parents.

The young couple have taken up residence in Bellevue.

Card of Thanks

I would like to take this opportunity of thanking Dr. Aiello, the matron and staff of the C. N. P. hospital, for their many kindnesses and care extended to me during my recent illness, also to all those who sent flowers, cards and gifts.

Mrs. D. Sudworth.

Engagement Announcement

Mr. and Mrs. J. Owen announce the engagement of their daughter, Laura Mae, to Mr. Gordon Walter White, son of Mr. and Mrs. Walter White of Toronto. Wedding to take place at St. Paul's United Church, Coleman, Alberta, on March 2nd, 1957.

The Goodwill W.A. of St. Paul's United Church will hold a
